Register and rooms: what changes

MAISON ANVERSA

Two changes to the opening on staging.
1. The register becomes **one centred column of 600 px**: title, legend, grid and buttons all aligned. The room list below uses the same column.
2. **No room photos.** A window or a room name goes **straight to that room's page**. On hover or keyboard focus the window lights up and shows a small label.

Desktop · 1440 px · afternoon · hovering the Bibliothèque window

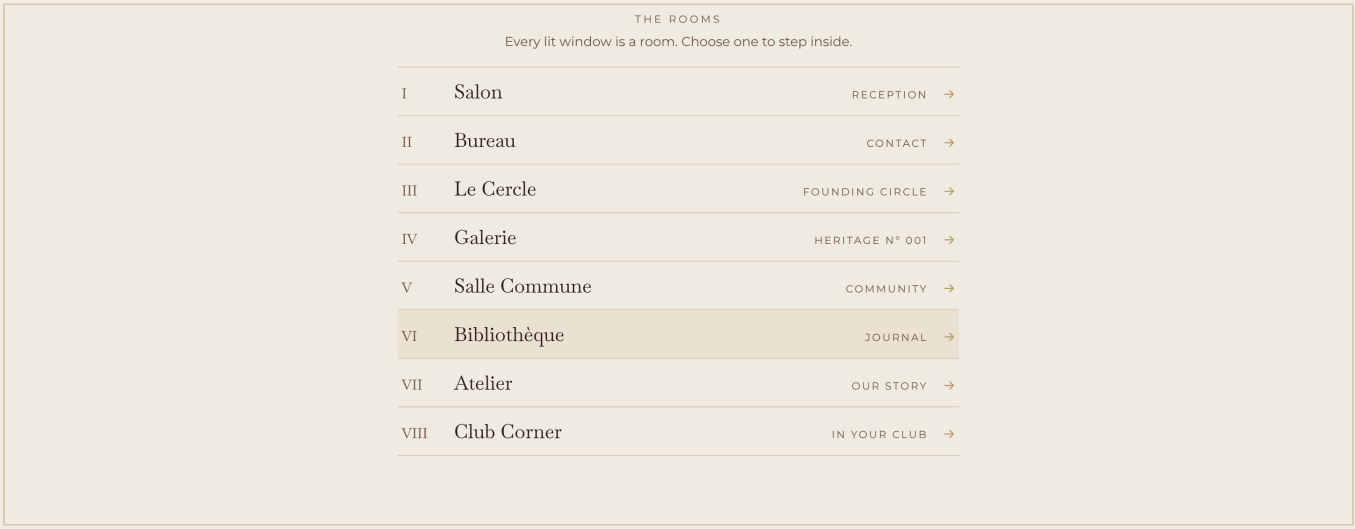

Everything else in the opening stays as it is now on staging (texts, moods, Antwerp time, door animation).

Desktop: register and room list

MAISON ANVERSA

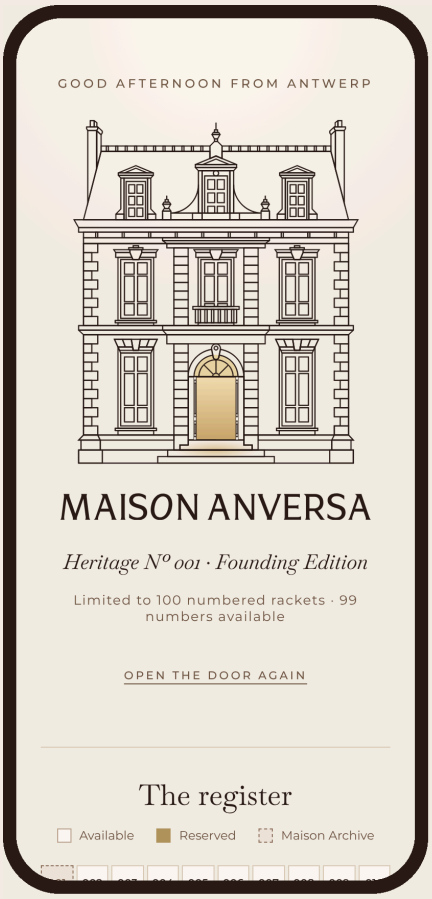

Specification

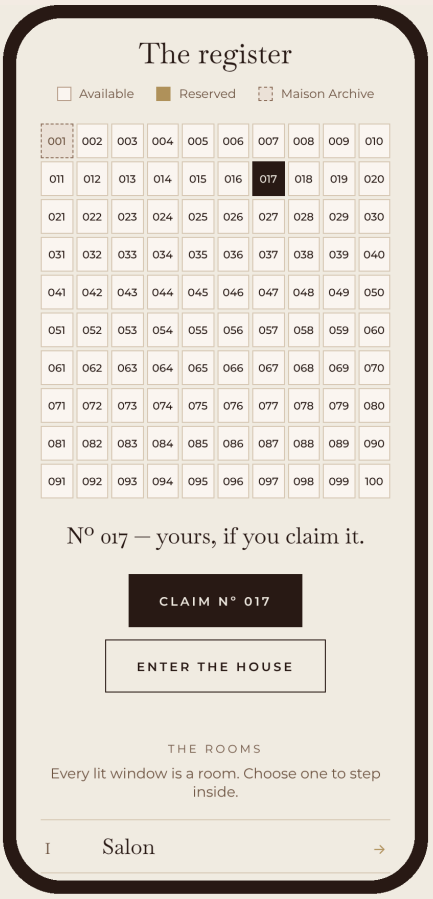

- **One column:** `max-width:600px; margin:0 auto` for the register and the room list. Title and legend **centred**; the divider line spans the same 600 px.
- **Grid:** 10 per row, gap 6 px, tiles ± 55 × 44 px (`aspect-ratio:5/4; min-height:44px`).
- **N° 001 · Maison Archive:** dashed border #8D705A, background #EDE3D8, text #6E5644, not selectable; same swatch in the legend.
- **Selected number:** chocolate tile; “N° 017 — yours, if you claim it.” centred under the grid; button becomes “Claim N° 017”.
- **Room list:** numeral · name (Baskervville) · label · gold arrow; the whole row is a link; hover = light gold background and the matching window lights up.

Mobile · 390 px

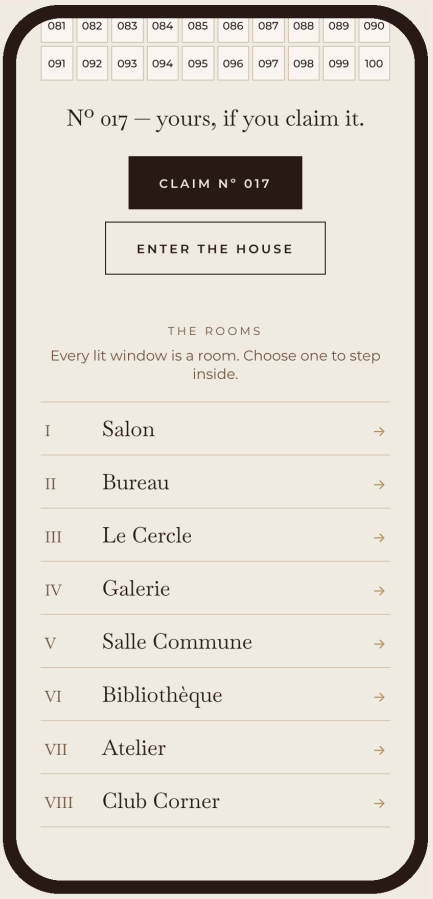

MAISON ANVERSA

1 · House

2 · Register: 10 × 10 on one screen

3 · Rooms

- **Register on mobile: also 10 × 10**, compact, so all 100 numbers fit on one screen. Tiles ± 33 × 34 px, gap 3 px, numbers 10.5 px. The selected number is confirmed in large text under the grid (“N° 017 — yours, if you claim it.”), so a wrong tap is easy to correct.
- **Legend** and **buttons** centred; the buttons stack when they don’t fit side by side.
- **Room list:** the labels (Reception, Contact…) are hidden below 560 px; numeral, name and arrow stay.
- No horizontal scroll (`overflow-x:clip` on html and body; the light glow must not widen the page).

Behaviour and files

MAISON ANVERSA

Windows and room names = links

#	ROOM	LABEL (TRANSLATED)	GOES TO
I	Salon	Reception	`/{lang}`
II	Bureau	Contact	`/{lang}/contact`
III	Le Cercle	Founding Circle	`/{lang}/circle`
IV	Galerie	Heritage N° 001	`/{lang}/products/heritage-no-001`
V	Salle Commune	Community	`/{lang}/community`
VI	Bibliothèque	Journal	`/{lang}/journal`
VII	Atelier	Our Story	`/{lang}/story`
VIII	Club Corner	In your club	`/{lang}/corner`

- Each window is a real `<a href>` over the SVG (positions in % in the reference), `aria-label` "Bibliothèque, Journal".
- **Hover / focus:** the window lights up (opacity 1, 0.3 s) and a small chocolate label appears above it: "BIBLIOTHÈQUE · JOURNAL". Hovering a name in the list lights up the same window, and the other way round.
- Focus outline only for keyboard users: `:focus-visible`, 2 px #8D705A.
- **Remove** the room view with photos and every room photo (AVIF) from the opening. Nothing loads until a room is chosen.
- "Enter the house" closes the opening and shows the homepage.

File

`opening-reference-v3.html` — working reference with exactly this layout (desktop and mobile), the hover behaviour and the links. Open it in a browser; add `?light=evening` to see the evening mood.
