DEVELOPER BRIEFING — FOR TAREEN

Returns & inscription

MAISON ANVERSA

Why. In the EU, customers have a 14-day right to return an online purchase. A customer could buy a number, appear in the register and then return the racket. Names therefore only become public, and permanent, once the return period has passed. The number belongs to the racket, not to the person: a returned racket is sold again under the same number, with the same passport.

1 · Number statuses

STATUS	MEANING	PUBLIC REGISTER
AVAILABLE	Can be chosen	"Available", selectable
HELD	Chosen at checkout, locked 15 min (already built)	Not selectable
RESERVED	Paid · within the 14-day return period	"Reserved" · **no name** · not selectable
INSCRIBED	Delivery + 14 days passed · permanent	Name according to customer's choice, or "Private Member"
RETURNING	Return requested, racket on its way back	Admin only · public shows "Reserved"

2 · Public register & counter

- Only **Inscribed** numbers show a name (or "Private Member").
- The counter counts **Reserved + Inscribed** as taken, so a number can never be sold twice.
- "Manage my listing" visibility settings only take effect from **Inscribed**.

3 · Automatic move to Inscribed

- A daily scheduled job moves RESERVED → INSCRIBED when **delivery date + 14 days** has passed.
- Delivery date: the carrier's "delivered" status if available. Otherwise entered manually in the admin. Fallback: shipping date + 5 days.
- On that day, the inscription email is sent once (see pages 2–3), in the customer's language, via Brevo.

Please confirm whether this fits in the current scope, or send a separate quote and timeline. A short Loom of the full flow (purchase → Reserved → Inscribed, and a return) once built would be appreciated.
