MAISON ANVERSA

Sessions: the full experience

01 · GOAL

From a listing to an experience

Joining a session works. Now we want the whole journey to feel complete: the organiser knows who joins, every player receives a clear overview, players can coordinate among themselves, and sessions can be shared to grow the platform.

Out of scope (not now): free private messaging between all members. The session conversation covers the need to coordinate; general member-to-member messaging can be considered later.

Please send a time and cost estimate per phase before starting.

02 · PHASE 1

Notifications, emails, sharing, session card

A. Notifications to the organiser (in-app bell + email E1): when someone joins or leaves, the organiser sees who, and how many places are left.

B. Emails to players via Brevo, in NL / EN / FR, in the website style (logo, Deep Chocolate header, Warm Ivory content blocks):

#	TRIGGER	RECIPIENT	SUBJECT (NL / EN / FR)	CONTENT
E1	A member joins	Organiser	Nieuwe speler voor uw sessie / New player for your session / Nouveau joueur pour votre session	Name of the new player, session details, number of free places, link to the session.
E2	A member joins	The member who joined	U speelt mee / You're in / Vous êtes inscrit	Session details (club, address, date, time, level), other players, link to the conversation, calendar file (.ics).
E3	Session becomes full	All players incl. organiser	Uw sessie is volzet / Your session is full / Votre session est complète	Full overview: club, address + route link, date, time, level, all players, link to the conversation, calendar file (.ics). See mockup.
E4	A player leaves	Organiser (+ other players if session was full)	Een plaats is vrijgekomen / A spot has opened up / Une place s'est libérée	Who left, new number of free places, link to share the session again.
E5	24 hours before start	All players	Morgen op de baan / Tomorrow on court / Demain sur le terrain	Short reminder with time, address and route link.
E6	Organiser cancels	All players	Sessie geannuleerd / Session cancelled / Session annulée	Session details and optional message from the organiser.
E7	New message in conversation	Other players	Nieuw bericht in uw sessie / New message in your session / Nouveau message dans votre session	Sender + first line; batched (max. one email per 30 min per session) to avoid spam.

Each confirmation email (E2, E3) includes an .ics calendar file ("Zet in agenda" / "Add to calendar").

C. Share a session

- "Deel / Share / Partager" button on every session card and session page, for organiser and players.

- On mobile: native share menu (WhatsApp, Messages, etc.). On desktop: copy link.
- Public session link with a preview (title, club, date, free places) for link previews in WhatsApp and social media (Open Graph tags).
- Non-members who open the link see the session preview and a button "Maak een account om mee te doen" / "Create an account to join". After registration they return to the same session and can join directly.
- No personal data of players is shown to visitors who are not logged in: only first name or initials.

D. Session card improvements (see mockup on the next page): clear free places, "3 plaatsen vrij" in a readable size, "Georganiseerd door …", primary button "Doe mee", secondary button "Deel", higher contrast overall.

Session card

03 · PHASE 2

Session conversation (players only)

- A message thread on the session page, only visible to the organiser and the players of that session.
- Available as soon as a player has joined, so players can coordinate before the session is full (court, balls, time).
- Not real-time chat: messages appear after refresh or a short polling interval; new messages trigger email E7 (batched).
- Players who leave the session lose access to the conversation.
- The conversation becomes read-only 48 hours after the session and is deleted after 30 days.
- "Melden / Report" link on each message; reported messages are visible to the admin.
- Admin can view and remove messages in case of abuse.

04 · ACCEPTANCE

Checklist

- Organiser receives in-app notification and email when a player joins or leaves.
- Emails E1–E7 work in NL / EN / FR, in the website style, with correct session details and .ics file.
- Share button works on mobile (native share) and desktop (copy link); link preview shows title, club, date and free places.
- Non-members can open a shared session, create an account and join directly.
- Session card matches the mockup: visible free places, clear count, "Doe mee" and "Deel".
- Session conversation is only visible to the players of that session; report and admin removal work.
- No raw error pages (403/404) anywhere in the flow.

Names in the mockups are placeholders. Copy for the emails can be finalised with Yusuf before going live.
