# Homepage opening: “The door opens”

MAISON ANVERSA

**Goal.** Today the homepage is slow to appear. It is replaced by an opening that is **light, instant and ours**: the Maison Anversa house draws itself, the front door opens, warm light comes out, and the visitor arrives directly at the register of numbers. No image, no video, no loading screen: everything is inline SVG and CSS.

## 1 · Storyboard (mobile, 390 px)

0.6 s · lines start at the steps | 1.3 s · the house builds upward | 2.1 s · drawing complete, solid | 2.9 s · the doors open, light comes on | 4.4 s · wordmark, edition, register

## 2 · New order of the homepage

| # | SECTION | CONTENT |
|---|---|---|
| 1 | Opening (hero) | Greeting · house illustration · wordmark (as the page's h1) · “Heritage N° 001 · Founding Edition” · “Limited to 100 numbered rackets · [X] numbers available” · “Open the door again” |
| 2 | The register | Grid of the 100 numbers + two buttons: **Choose your number** / **Enter the house** |
| 3 | The eight rooms | The current homepage sections, unchanged, below the register. “Enter the house” scrolls here. |

Live prototype: Yusuf shares the link separately. The **reference implementation** (opening-reference.html in the zip) runs as-is in any browser and contains every timing and rule below.

# Timeline and look

MAISON ANVERSA

## 3 · Timeline (total ± 4.5 s, page usable from 0 s)

| START | ELEMENT | EFFECT | DURATION / EASING |
|---|---|---|---|
| 0.0 s | Greeting | Fade + rise 10 px | 0.9 s, ease-out, delay 0.2 s |
| 0.0–2.0 s | House lines | Stroke draw (stroke-dashoffset 1→0, pathLength=1). 8 horizontal bands, bottom to top, each 0.15 s later. | 0.95 s per band, cubic-bezier(.55,.1,.35,1) |
| 1.5 s | House fill | Solid fill fades in under the lines | 0.8 s, ease-out |
| 2.25 s | Door leaves | Two leaves turn inward on their outer hinge: scaleX(1 → .12), left from left edge, right from right edge | 1.15 s, cubic-bezier(.55,0,.2,1) |
| 2.25 s | Light | Gold gradient behind the doors and in the fanlight | 1.0 s, ease-out |
| 2.6 s | Light on the steps | Soft radial glow under the door | 1.0 s, ease-out |
| 3.0 s | Wordmark | Fade + rise | 0.9 s |
| 3.35 s | Edition + numbers available | Fade + rise | 0.9 s |
| 3.7 s | Replay link + register | Fade + rise | 0.9 s |

## 4 · Colours and type

| USE | VALUE |
|---|---|
| Background | Warm Ivory #F3EBE3 |
| House lines, wordmark, text, main button | Deep Chocolate #291C18 |
| Secondary text | #6E5644 (passes contrast on ivory; Taupe #8D705A does not for small text) |
| Light behind the door | Gradient #F2DDB0 → #C9A56A, fanlight #E9D2A2, step glow #D9BC85 |
| Reserved numbers | Antique Gold #B2915C |
| Fonts | Baskervville (edition line, headings) · Montserrat 400/500/600 (rest) · font-display: swap |

## 5 · Size on screen

- House: width: min(380px, 72vw), aspect-ratio: 662/796 so the space is reserved from the first paint (no layout shift).
- Wordmark: min(420px, 78vw). Hero padding 56 px top, gap 28 px.

# Build rules and files

MAISON ANVERSA

## 6 · Rules

- **Inline SVG in the HTML**, rendered by the server. No `<img>`, no Lottie, no video, no JS needed to show the house. The full opening is ± 34 KB gzipped.
- **No loading screen and no waiting.** Text and buttons exist in the HTML from the start; only CSS animates them.
- **Once per session.** After the first view, set `sessionStorage['ma-door-opened']`. Further page views in that session show the end state at once (class `is-done`).
- **Skip.** A tap/click on the hero, any key, or the first scroll jumps straight to the end state.
- **Reduced motion.** With `prefers-reduced-motion: reduce`, show the end state without animation.
- **Replay.** "Open the door again" restarts the animation (see reference JS).
- **Accessibility/SEO.** House SVG `aria-hidden`; wordmark in the `h1` with `role="img" aria-label="Maison Anversa"`; register buttons are real `<button>`s with `aria-pressed` and an `aria-label` ("N° 017, available"). Touch targets ≥ 44 px.
- **Layer order inside the SVG** (do not change): light → house fill → house lines → left door leaf → right door leaf. Each leaf has its own ivory backing so the light stays hidden until it opens. CSS on leaves: `transform-box: fill-box`.
- Animate only `opacity`, `transform` and `stroke-dashoffset`. Tested in Chromium; please also check Safari iOS and Firefox.

## 7 · Files in the zip

| FILE | USE |
|---|---|
| opening-reference.html | Working reference: hero, animation, register, all CSS and JS. Port this into the site. |
| house-full.svg | The house, one colour, static (e.g. footer, 404, emails) |
| house-without-door-leaves.svg, door-leaf-left.svg, door-leaf-right.svg | Same viewBox (958 142 662 796): stack them to rebuild the door scene in another tool |
| wordmark.svg | Maison Anversa wordmark, Deep Chocolate |

# Register, buttons and texts

MAISON ANVERSA

## 8 · Register logic

- **Data:** the reserved/sold numbers come **live** from the same source as the existing register (no hard-coded list). The number "[X] available" is 100 minus that list. Cache max. 60 s.
- Reserved/sold numbers: gold, disabled. Click on a free number selects it (dark); a second click deselects.
- **Choose your number** without a pick scrolls to the register. With a pick, the button becomes **Claim N° 017** and opens the existing reservation/checkout flow with that number pre-selected (e.g. ?number=017). The number is checked again on the server at checkout.
- **Before the public launch** the waitlist briefing applies: the register is visible, but button 1 says **Join the list** and opens the waitlist (the chosen number is passed as the preferred number).
- Greeting uses the visitor's local time and the page language.

## 9 · Texts

| ELEMENT | EN | NL | FR |
|---|---|---|---|
| Greeting 05–12 h | Good morning from Antwerp | Goedemorgen uit Antwerpen | Bonjour d'Anvers |
| Greeting 12–18 h | Good afternoon from Antwerp | Goedemiddag uit Antwerpen | Bel après-midi depuis Anvers |
| Greeting 18–24 h | Good evening from Antwerp | Goedenavond uit Antwerpen | Bonsoir d'Anvers |
| Greeting 00–05 h | Good night from Antwerp | Goedenacht uit Antwerpen | Bonne nuit depuis Anvers |
| Edition | Heritage N° 001 · Founding Edition | Heritage N° 001 · Founding Edition | Heritage N° 001 · Founding Edition |
| Limit | Limited to 100 numbered rackets · [X] numbers available | Beperkt tot 100 genummerde rackets · nog [X] nummers vrij | Limitée à 100 raquettes numérotées · [X] numéros disponibles |
| Replay | Open the door again | Open de deur opnieuw | Rouvrir la porte |
| Register title | The register | Het register | Le registre |
| Legend | Available · Reserved | Vrij · Gereserveerd | Disponible · Réservé |
| After a pick | N° [017]: yours, if you claim it. | N° [017]: van jou, als je het neemt. | N° [017] : à vous, si vous le réservez. |
| Button 1 (no pick) | Choose your number | Kies je nummer | Choisissez votre numéro |
| Button 1 (pick) | Claim N° [017] | Neem N° [017] | Réserver le N° [017] |
| Button 2 | Enter the house | Kom binnen | Entrer dans la maison |

# Acceptance tests

MAISON ANVERSA

Please run these on staging (mobile and desktop) before going live.

- First visit: house draws bottom to top, doors open at ± 2.3 s, light comes on, wordmark and register appear. Whole sequence ± 4.5 s.
- Lighthouse mobile: LCP under 2.0 s, CLS 0.00, no image or video requests for the hero.
- Second page view in the same session: end state at once, no animation.
- Tap on the hero, press a key or scroll during the animation: jumps to the end state.
- “Open the door again” replays the full sequence.
- Reduced motion on (iOS: Settings → Accessibility → Motion): end state, no animation.
- Safari iOS, Chrome Android, Firefox, Safari macOS: doors open from the outer edges, no flicker, light hidden before opening.
- Register: reserved numbers match the backend; “[X] numbers available” is correct; pick → button reads “Claim N° 0XX” and opens checkout with that number; a number taken meanwhile is refused at checkout with a clear message.
- Before launch: button 1 reads “Join the list” and passes the number to the waitlist.
- NL, EN, FR: all texts and greetings correct per language and time of day.
- Keyboard: Tab reaches every number and both buttons, focus is visible; screen reader reads “N° 017, available”.
